MEMORANDUM FOR: Chief, Safety Staff/DDA

FROM: 

Executive Officer to the DDA

SUBJECT: Asbestos in Remington Rand Safes

REFERENCE: Memo for DDO fm DDA dtd 20 Dec 84,  
Subject: Replacement of Asbestos Content Safes

Herb,

As you know, due to the concern raised by the DDO, we have just reviewed again the status of Remington Rand safes containing asbestos. Referent memorandum was forwarded to the DDO after consultation with you, the Office of Medical Services, and the Office of Logistics. Hopefully, this has satisfied the DDO concerns over the potential health hazard of the Remington Rand safe. I believe that what we need to do now is to make sure that all Agency employees are aware that these safes do not pose a serious health hazard.

2. In this regard, I would like for you to prepare an employee bulletin outlining the findings of Safety Staff and Office of Medical Services from the several reviews that have been conducted of the Remington Rand safe asbestos problem. Also, you should explain the replacement program that has been underway for several years and our plans to continue this effort.
